Summary

Computer Systems Engineer with full-stack capabilities and a strong focus on frontend development. Experienced in building scalable applications across corporate, freelance, and academic environments. Currently working with React, Next.js, TypeScript, Tailwind CSS, Motion, Prisma, and Supabase. Based in Chihuahua and open to remote roles.

Work Experience

Intern Jul. 2026 – Present
AutoZone *Chihuahua, Mexico*

Leading the frontend development for the Headcount Management application, utilizing Starc, a proprietary UI component library, to build standardized and responsive interfaces. Operating within an Agile environment using Jira for sprint management, and GitLab for version control and collaborative development.

Intern Jan. 2026 – Jun. 2026
Visteon Corporation *Chihuahua, Mexico*

Worked on an internal application called Plant Launch Readiness. Focused mainly on the frontend using React, TypeScript, Tailwind, and Motion. Occasionally contributed to the C# and ASP.NET Core backend and managed the SQL Server database. Used IIS for hosting and deployment, and Git for version control.

Intern Jul. 2025 – Dec. 2025
Ford Motor Company *Chihuahua, Mexico*

Developed Power Apps using Microsoft Lists as a data source integrated via SharePoint, and implemented Power Automate to trigger automated workflows within the application.

Projects

Casas Abrek | *Next.js, TypeScript, Tailwind, Motion* casasabrek.com | Link to Repo

– Landing page for a construction company, featuring a multi-step questionnaire for better client outreach and a dedicated page for each major project.

Nai Velas Artesanales | *Next.js, TypeScript, Tailwind, Motion* Link to Vercel App | Link to Repo

– Platform for a handmade candle business, featuring a client-side cart that generates WhatsApp order messages

Milano Caffe Bistrot | *Next.js, TypeScript, Tailwind, Motion* Link to Vercel App | Link to Repo

– Landing page for a restaurant, featuring a digital menu and a language selector between English and Spanish.

Alejandro Prieto | *Next.js, TypeScript, Tailwind, Motion* Link to Vercel App | Link to Repo

– Landing page for an architect, featuring a dedicated page for each project and a light/dark mode toggle.

Swapi | *MongoDB, Express, React, Node.js, Kotlin* Link to Vercel App | Link to Repo

– Built a private university marketplace with the MERN stack and a native Android companion app (Kotlin, Jetpack Compose, MVVM), including JWT auth, email verification, and CRUD operations.

Education

Universidad La Salle Chihuahua — Chihuahua, Mexico
B.S. in Computer Systems Engineering — *Dec. 2026*

Building a versatile engineering foundation centered on scalable full-stack and mobile solutions. Integrating secure principles with modern DevOps practices, including containerization and version control, to develop efficient, multi-language applications across diverse environments.

Jesuitinas Vigo – Colexio Miralba — Vigo, Spain
Science and Technology Baccalaureate — *2019 – 2021*

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS, SQL, C#

Frontend Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Motion

Backend & Runtime: Node.js, Express.js, REST APIs, ASP.NET

Databases & BaaS: PostgreSQL, MongoDB, SQL Server, Supabase

ORMs: Entity Framework, Prisma

Auth: JWT, Supabase Auth

DevOps & Tools: Git, GitHub, GitLab, Vercel, Render, Docker, Postman, Windows Server, Ubuntu Server

Power Platform: Power Apps, Power Automate

Spoken Languages: Spanish (native), English (C1 – TOEFL ITP 617/677)
